Chapter 1

The Scope of Psychopathology	1 – 6
descriptive psychopathology	1 – 2
syndromal psychopathology	2
nosology	2 – 3
functional (psychological) analysis	3 – 5
neuropsychological (organic) analysis	5
metaphysical (phenomenological) analysis	5 – 6

Chapter 2

Descriptive Psychopathology	7 – 114
normal experience	7 – 9
normal representation	9 – 10
normal behaviour	10
normal expression	10
anomalous experience	11 – 56
anomalous resistance	11 – 12
anomalous attraction or repulsion	12 – 14
anomalous emotions	14 – 21
anomalous psychic experiences	21 – 35
anomalous temporality	22 – 27
anomalous spatiality	27 – 32
anomalous corporeality	33 – 35
hallucination	35 – 41
illusion	41
anomalous experiences of the objective	
qualities of the world	41 – 48
anomalous experiences of internal world	48 – 50
anomalous experiences of self	50 – 51
agnosia	51 – 56
anomalous representations	56 – 88
delusion	59 – 74
amnesia	74 – 75
fugue	74 – 75
confabulation	75
spatial misrepresentation	75 – 76
corporeal misrepresentation	76 – 79
hysteria	77 – 78
apraxia	78 – 79

thought disorder	79 – 81
self-misrepresentation	81 – 84
multiple personality	83 – 84
dementia	84 – 86
Ganser syndrome	85
anomalous states of consciousness	86 – 87
inattention	87 – 88
anomalous behaviour	88 – 103
catatonia	93 – 95
anorexia nervosa	96 – 97
alcoholism	98 – 99
suicide	100 – 101
psychopathy	101 – 103
anomalous expressions	103 – 114
flattening of affect	105
formal thought disorder	106 – 108
	109 – 112
Chapter 3	
Syndromal and Nosological Psychopathology	115 – 130
Chapter 4	
Psychological / Functional Analysis of Psychopathology	131 – 157
historical perspective	132 – 140
critique of psychological analysis	141 – 142
current psychological ‘facts’	143 – 157
schizophrenia	143 – 148
depressive illness	148 – 150
neurosis and anomalous behaviour	150 – 151
delusion	151 – 156
hallucinations	156 – 157
Chapter 5	
Neuropsychological Analysis of Psychopathology	158 – 257
rudimentary right hemisphere functions	161 – 181
emotion	166 – 172
empathy	172 – 173
time	173 – 177
space	177 – 180
movement initiation	180 – 181
sophisticated right hemisphere functions	182 – 209
perception	183 – 189
verbal communication	189 – 191
learning and intelligence	191 – 196
memory	196 – 197

body	198 – 204
self	204 – 208
left hemisphere functions	209 – 225
religious values	213 – 214
aesthetic values	214 – 216
spiritual and mental lures	216 – 217
emotion	217 – 218
gnosis	218 – 219
reason, meaning and thinking	219 – 220
praxis	220
language	220 – 222
dreams and imagery	223
consciousness	224 – 225
personhood	225
left brain – right brain relationship	225 – 230
schizophrenia	231 – 244
depressive illness	244 – 251
mania	252
neurosis and anomalous behaviour	252 – 255
delusion	255 – 256
hallucination	256 – 257
Chapter 6	
Metaphysical Analysis of Psychopathology	258 – 328
chief contributors to topic	259 – 287
Jackson	259 – 260
Jaspers	260
Kurt Schneider	260 – 261
Minkowski	261
Binswanger	261 – 271
Straus	271
Von Gebsattel	271 – 272
Blankenburg	272 – 275
Kuhn	275
Kraus	276
Zutt	276
Tellenbach	276 – 277
Tatossian	278
Kulenkampff	278 – 279
Spitzer	279
Sass	279 – 283
Schwartz and Wiggins	283 – 284
Fuchs	284 – 287
Stanghellini	287

Andersch	287
philosophical mentors	260 – 308
Spencer	260
Dilthey	260
Weber	260
Bergson	261
Heidegger	261 – 266
Sartre	278
Husserl	280 – 283
Merleau-Ponty	284 – 286
Cassirer	287
Scheler	289 – 307
Schelerian psychopathology of	308 – 329
delusional misidentification	308 – 311
delusional perception	311 – 314
Cotard syndrome	314 – 317
Ganser syndrome	317 – 318
delusions of control / passivity experiences	318 – 320
delusions of guilt	320 – 322
hearing voices	322 – 324
schizophrenic autism	324 – 326
neurosis	326 – 327
social causation	327 – 328
Chapter 7	
Conclusions	329 – 331
References	332 – 381
Author index	383
Subject index	390
